

# Planning

## Music Player Project Plan 🎵

### 1. Purpose & Goal

Build a simple, user-friendly **music player** with **play, pause, skip, and playlist management**.

### 2. Problem It Solves

- Custom player instead of default system players.
- Easy **playlist management** and smooth playback.
- Works across devices with a clean UI.

### 3. Team Roles (If Working in a Team)

**Developer** – Builds the player & features.

**Designer** – Creates an intuitive UI.

**Tester** – Ensures everything works smoothly.

**Project Manager** – Tracks progress.

### 4. Roadmap (Key Milestones)

**Week 1:** Research & Plan Features

**Week 2:** Design UI & Layout

**Week 3:** Implement Music Controls

**Week 4:** Add Playlists & Storage

**Week 5:** Test & Fix Bugs

**Week 6:** Final Touches & Launch

### 5. Tech & Features

**Tech:** HTML, CSS, JavaScript (Vanilla or React)

**Features:** Play, Pause, Next, Volume, Playlist
